Projects

Examination Management System (Latest Project)

- Developed a full system using **Python Flask + MySQL** to manage hall-ticket requests.
- Built secure **admin and student dashboards** with role-based login.
- Enabled **fee verification**, approval workflow, and real-time request tracking.
- Designed a clean frontend using **HTML, CSS, and JavaScript**.
- Implemented an **automated hall-ticket generator** with downloadable output.

AI Desktop Assistant – "Jarvis"

- Developed an intelligent desktop assistant using **Python and Tkinter**.
- Integrated **OpenAI APIs** to enable natural language responses.
- Added voice commands for opening apps, searching, and daily tasks.
- Designed a modern GUI with smooth user interactions.
- Implemented automation features like reminders, system controls, and quick actions.

College Management System (Short-Term Project)

- Built core modules for student details, departments, and attendance.
- Developed responsive admin UI using HTML, CSS, and JavaScript.
- Created secure backend APIs with Python Flask.
- Used MySQL for efficient data storage and retrieval.
